OPERATION HIGHLIGHTS

FINANCIAL SUMMARY

1. The Group's total revenue increased by approximately RMB93.4 million to RMB110.4 million for the six months ended 30 June 2020, compared to RMB17.0 million for the six months ended 30 June 2019. Such revenue was from drug sales, research and development ("R&D") services provided to customers, and license revenue.
2. For the six months ended 30 June 2020, the Group recognised R&D expenditure of approximately RMB756.9 million, representing an increase of approximately RMB228.4 million as compared with approximately RMB528.5 million for the six months ended 30 June 2019.
3. The Group's total loss increased by RMB131.1 million to RMB448.0 million for the six months ended 30 June 2020, compared to RMB316.9 million for the six months ended 30 June 2019, mainly due to the expansion of R&D activities.

OPERATION HIGHLIGHTS

PRODUCTION SCALE AND EQUIPMENT
ADDITION OF 500MG/50ML/VIAL
SPECIFICATION

MARKETING AUTHORISATION APPLICATION

漢利康

Applications for the addition of 2,000L drug substance production scale and 2,000L production equipment, and the addition of the specification of 500mg/50ml/vial on the basis of the original specification of 100mg/10ml/vial were approved by the NMPA in April 2020; the supplemental applications for the two new indications were approved by the NMPA in July 2020.

The Marketing Authorisation Application (MAA) for HLX02 trastuzumab injection (EU trade name: Zercepac®) submitted by a wholly-owned subsidiary of Accord, the Group's business partner, was accepted by the European Commission (EC) in July 2020.

The NDA for HLX02 trastuzumab injection (trade name in mainland China: 漢曲優) was approved by the NMPA in August 2020.

Xuhui Facility has received the GMP certification issued by the EU in respect of HLX02 trastuzumab injection (EU trade name: Zercepac®) drug substance (DS) and drug product (DP) line in April 2020, and has passed the on-site inspection conducted by Shanghai Medical Products Administration (上海市藥品監督管理局) in respect of HLX02 trastuzumab injection (trade name in mainland China: 漢曲優) drug substance (DS) south line and drug product (DP) No. 1 line in July 2020. As of the Latest Practicable Date, Xuhui Facility has completed the filing of production approval for new key equipment of four 2,000L bioreactors to Shanghai Medical Products Administration and the Group's overall commercial production capacity has been increased to 20,000L.

The Phase 3 clinical study for the treatment of metastatic colorectal cancer (mCRC) has completed in August 2020, and the trial has met the pre-defined primary endpoint.

The NDA for the treatment of metastatic colorectal cancer (mCRC) and advanced, metastatic or recurrent non-small cell lung cancer was accepted by the NMPA in September 2020.

Xuhui Facility has passed the on-site inspection conducted by Shanghai Medical Products Administration in respect of HLX03 (adalimumab injection) drug substance (DS) south line and drug product (DP) No. 1 line in September 2020.

MANAGEMENT DISCUSSION AND ANALYSIS

S I S U R N I E V R W E E F O S T R H F I E T A H L F O T F R H A E E

Adhering to our vision of “be the most trusted and admired innovative biotech company in the world by focusing on providing quality and affordable medicines for all patients”, and benefitting from our efficient biopharmaceutical industry-wide platform that integrates R&D, production and commercialisation into a whole, outstanding global regulatory registration and clinical operational capability, comprehensive quality management system as well as strong commercial operational capability, the Group has gradually made significant progress on product R&D and commercialisation during the Reporting Period.

MANAGEMENT DISCUSSION AND ANALYSIS

In April 2020, the Group received two Certificates of GMP Compliance of a Manufacturer, being the GMP Certificates, from Chief Pharmaceutical Inspectorate, being the hygiene supervision organization in Poland. The Company's drug substance (DS) line and drug product (DP) line for HLX02 trastuzumab injection (EU trade name: Zercepac®) at Xuhui Facility passed the GMP certification by the EU. In July 2020, the Group received the "Notification of the Results of the On-site Inspection of Pharmaceutical Production Base" (《藥品生產現場檢查結果告知書》) issued by Shanghai Medical Products Administration, notifying that the drug substance (DS) south line and drug product (DP) No. 1 line for HLX02 trastuzumab injection (trade name in mainland China: 漢曲優) at Xuhui Facility have successfully passed the on-site inspection by Shanghai Medical Products Administration.

1. MAB BIOSIMILARS THAT ARE EXPECTED TO BE COMMERCIALISED IN THE NEAR FUTURE

The NDA for HLX03 self-developed by the Group was accepted by the NMPA in January 2019 and is currently in the priority review process. As of the Latest Practicable Date, HLX03 for the treatment of plaque psoriasis indications has completed the phase 3 clinical trial in mainland China, which showed that the efficacy of HLX03 for moderate to severe plaque psoriasis is equivalent to that of the original drug, and it is similar to the original drug in terms of safety, immunogenicity and pharmacokinetics. Meanwhile, Xuhui Facility has passed the on-site inspection conducted by Shanghai Medical Products Administration in respect of HLX03 (adalimumab injection) drug substance (DS) south line and drug product (DP) No. 1 line. As of the Latest Practicable Date, the Phase 3 clinical study of the Avastin® biosimilar HLX04 (recombinant humanised anti-VEGF monoclonal antibody injection) developed by the Group for the treatment of metastatic colorectal cancer (mCRC) has completed and the trial has met the pre-defined primary endpoint. The NDA for its treatment of metastatic colorectal cancer (mCRC) and advanced, metastatic or recurrent non-small cell lung cancer was accepted by the NMPA.

2. CONTINUOUS AND EFFICIENT ADVANCEMENT ON CLINICAL RESEARCH PRODUCTS

As of the Latest Practicable Date, the Group has established a highly efficient and experienced global clinical development team to actively promote the clinical research of multiple candidate drugs in multiple locations around the world, and achieved promising progress. HLX10 (PD-1) is the core innovative mAb in the Group's product pipeline. As of today, HLX10 (PD-1) has been successively approved for clinical trials in the United States, Taiwan, China and mainland China. While actively promoting the clinical development of HLX10 (PD-1), the Group is also actively implementing the differentiated strategy of "Global + Combo". With HLX10 (PD-1) as the core, and combining with other pharmaceutical products, clinical trials are being conducted simultaneously in multiple countries and regions worldwide. As of the Latest Practicable Date, "HLX10 + chemotherapy" is used to treat locally advanced/metastatic esophageal squamous cell carcinoma, locally advanced or metastatic squamous non-small cell lung cancer, previously untreated extensive-stage small cell lung cancer, neoadjuvant/adjuvant treatment of gastric cancer, and advanced cervical cancer that five phase 2/3 clinical trials have all completed the first-in-patient dosing in mainland China. The "HLX10 + HLX04" Phase 2 clinical trial for the treatment of advanced hepatocellular carcinoma and the Phase 3 clinical trial for the treatment of non-squamous non-small cell lung cancer were both completed in mainland China. In March 2020, the first patient dosing in mainland China was completed in a Phase 2 clinical trial of HLX10(PD-1) in combination with albumin-bound paclitaxel for the treatment of advanced cervical cancer (CC) patients who have failed to respond to the first-line standard chemotherapy. In April 2020, the first-in-patient dosing in Turkey was completed in a Phase 3 clinical trial to compare HLX10(PD-1) in combination with chemotherapy (carboplatin nab-paclitaxel) against chemotherapy (carboplatin nab-paclitaxel) as first-line therapy for locally advanced or metastatic squamous non-small cell lung cancer (sqNSCLC). In the same month, the first patient dosing in Turkey was completed in a Phase 3 clinical trial of HLX10(PD-1) or placebo in combination with chemotherapy (Carboplatin-Etoposide) in previously untreated patients with extensive-stage small cell lung cancer (ES-SCLC). In July 2020, the first patient dosing in mainland China was completed in a Phase 2 clinical trial of HLX10(PD-1) in combination with recombinant anti-EGFR humanised monoclonal antibody injection (HLX07) for the treatment of recurrent or metastatic head and neck squamous cell carcinoma.

The Group has also promoted clinical research on a number of other products in an orderly manner: As of the Latest Practicable Date, the innovative anti-PD-L1 mAb HLX20 is in the Phase 1 clinical trial in Australia, which is expected to be combined with other products to develop tumour immunotherapy, and to be widely used in the treatment of solid tumours. In March 2020, the first patient dosing in Taiwan, China was completed in a Phase 1 clinical trial of HLX55 monoclonal antibody for injection (“HLX55”) for the treatment of advanced solid tumours refractory to standard therapy. In March 2020, recombinant humanised anti-EGFR monoclonal antibody injection (“HLX07”) has demonstrated its good safety and tolerability in a prospective, open-labelled, dose-escalation Phase 1 clinical trial designed to assess it in the treatment for metastatic or recurrent epithelial tumours refractory to standard therapy, and the relevant clinical study report has been finished. As of today, the improved innovative anti-EGFR mAb HLX07 is in the Phase 1b/2 clinical trial process and is expected to be used in the treatment for nasopharyngeal cancer, colorectal cancer and other solid tumour indications.

3. ACCELERATING THE DEVELOPMENT OF MULTIPLE PRE-CLINICAL RESEARCH PROJECTS

The Group accelerated the development of the pre-clinical research pipeline simultaneously. In January 2020, the investigational new drug application (IND) of ipilimumab biosimilar HLX13 (recombinant anti-CTLA-4 fully humanised monoclonal antibody injection) was accepted by the NMPA, whose indications include: (i) unresectable or metastatic

MANAGEMENT DISCUSSION AND ANALYSIS

The following table demonstrates the product development plans and results of the Group from the beginning of 2020 to the Latest Practicable Date:

HLX01 (漢利康)	<ul style="list-style-type: none"> - In April 2020, addition of 2,000L drug substance production scale and 2,000L production equipment was approved by the NMPA - In April 2020, the addition of 500mg/50ml/vial to the original specification of 100mg/10ml/vial was approved by the NMPA - In July 2020, supplemental applications for two new indications were approved by the NMPA 	
HLX02 trastuzumab injection (trade name in mainland China: 漢曲優; EU trade name: Zercepac®)	<ul style="list-style-type: none"> - In April 2020, Xuhui Facility's drug substance (DS) and drug product (DP) line for HLX02 trastuzumab injection (EU trade name: Zercepac®) passed the GMP inspection by the EU - In July 2020, the MAA of HLX02 trastuzumab injection (EU trade name: Zercepac®) has been officially approved by the European Commission (EC) - In July 2020, Xuhui Facility's drug substance (DS) south line and drug product (DP) No. 1 line for HLX02 trastuzumab injection (trade name in mainland China: 漢曲優) passed the on-site inspection conducted by the Shanghai Medical Products Administration - In August 2020, the NDA of HLX02 trastuzumab injection (trade name in mainland China: 漢曲優) was approved by the NMPA 	<ul style="list-style-type: none"> - In March 2020, the Company entered into an exclusive licence agreement with Mabxience, granting it the exclusive licence for the development and commercialisation of HLX02 trastuzumab injection for oncology treatment in Argentina, Uruguay and Paraguay - In June 2020, the Company entered into the Amendment to the License Agreement with Accord in respect of HLX02 trastuzumab injection (EU trade name: Zercepac®). On the basis of the License Agreement entered into by both parties for HLX02 trastuzumab injection (EU trade name: Zercepac®) in June 2018, the Amended Agreement is made in respect of the new specifications and the corresponding milestone payment arrangement no more than USD3.08 million, and the adjustment in the royalties of HLX02.
HLX03 (adalimumab)	<ul style="list-style-type: none"> - In January 2019, NDA of HLX03 (adalimumab) was accepted by the NMPA and is currently in the priority review process - In September 2020, Xuhui Facility has passed the on-site inspection conducted by Shanghai Medical Products Administration in respect of HLX03 (adalimumab) drug substance (DS) south line and drug product (DP) No. 1 line 	

MANAGEMENT DISCUSSION AND ANALYSIS

HLX04 (bevacizumab)	<ul style="list-style-type: none"> – In August 2020, Phase 3 clinical trial of HLX04 (bevacizumab) for the metastatic colorectal cancer indication was completed in mainland China. – In September 2020, the NDA for HLX04 (bevacizumab) for the treatment of metastatic colorectal cancer (mCRC) and advanced, metastatic or recurrent non-small cell lung cancer was accepted by the NMPA
HLX01 (漢利康)	<ul style="list-style-type: none"> – Phase 3 clinical trial of rheumatoid arthritis indication completed the enrollment of patients
HLX10 (innovative anti-PD-1 mAb)	<ul style="list-style-type: none"> – Phase 2 clinical trial in progress (chronic hepatitis B; unresectable or metastatic microsatellite instability-high or mismatch repair-deficient solid tumours that fails to respond to the standard therapy)
HLX10+HLX04	<ul style="list-style-type: none"> – Phase 3 clinical trial in progress (metastatic non-squamous non-small cell lung cancer) – Phase 2 clinical trial in progress (advanced hepatocellular carcinoma)
HLX10+HLX07	<ul style="list-style-type: none"> – In July 2020, Phase 2 clinical study for the treatment of recurrent or metastatic head and neck squamous cell carcinoma (HNSCC) completed the first patient dosing in mainland China
HLX10+chemotherapy	<ul style="list-style-type: none"> – Five Phase 2/3 clinical trials ongoing (locally advanced/metastatic esophageal squamous cell carcinoma, extensive-stage small cell lung cancer, gastric cancer, locally advanced or metastatic squamous non-small cell lung cancer, advanced cervical cancer)
HLX55 (innovative anti-c-MET mAb)	<ul style="list-style-type: none"> – In March 2020, Phase 1 clinical study completed the first patient dosing in Taiwan, China
HLX07 (improved innovative anti-EGFR mAb)	<ul style="list-style-type: none"> – Phase 1b/2 clinical trial in progress in mainland China – In March 2020, the recombinant humanised anti-EGFR monoclonal antibody injection (HLX07) has demonstrated its good safety and tolerability in a prospective, open-labelled, dose-escalation Phase 1 clinical trial designed to assess it in the treatment for metastatic or recurrent epithelial tumours refractory to standard therapy, and the relevant clinical study report has been finished.

MANAGEMENT DISCUSSION AND ANALYSIS

HLX13 (ipilimumab)	– In April 2020, IND was approved by the NMPA
HLX11 (pertuzumab)	– In January 2020, IND was approved by the NMPA – In September 2020, Phase 1 clinical study completed the first patient dosing in mainland China
HLX14 (denosumab)	– In May 2020, IND was approved by the NMPA
HLX56 (anti-DR4 mAb)	– In May 2020, the clinical trial for the treatment of advanced solid tumours refractory to standard therapy has been approved by the Ministry of Health and Welfare of Taiwan

(II) FORWARD-LOOKING PRODUCTION CAPACITY LAYOUT WITH HIGH COST-EFFICIENCY

In order to meet the expected demand for the gradual marketing of candidate drugs in the Group's product pipelines, the Group has formulated a phase-based capacity planning for the product development cycle, gradually improved and enhanced large-scale production capacity based on a sound quality management system, and maintained high quality standards while expanding production capacity and improving cost-efficiency. Meanwhile, the Group has established a quality control system that complies with international quality standards, covering the entire life cycle from project development to material management, product production, quality control, product supply chain management, and product follow-up after marketing, which lays a solid foundation for the commercialisation in multiple jurisdictions and regions.

As of the end of the Reporting Period, the Group has established Xuhui Facility, a biopharmaceutical production facility in Shanghai Caohejing Hi-Tech Park, which covers a total area of approximately 11,000 square metres. Xuhui Facility and its supporting quality management system have passed a number of on-site inspections and/or audits by EU qualified person and international business partners, which can meet the Group's short-term production needs. In April 2020, the Group received two Certificates of GMP Compliance of a Manufacturer from Chief Pharmaceutical Inspectorate, being the hygiene supervision organization of Poland. The Company's drug substance (DS) and drug product (DP) line for HLX02 trastuzumab injection (EU trade name: Zerceptac®) at Xuhui Facility passed the GMP certification by the EU. In July 2020, the Group received the "Notification of the Results of the On-site Inspection of Pharmaceutical Production Base" (《藥品生產現場檢查結果告知書》) issued by Shanghai Medical Products Administration, notifying that the drug substance (DS) south line and drug product (DP) No. 1 line for HLX02 trastuzumab injection (trade name in mainland China: 漢曲優) at Xuhui Facility have successfully passed the on-site inspection by Shanghai Medical Products Administration. In September 2020, the Group received the "Notification of the Results of the On-site Inspection of Pharmaceutical Production Base" (《藥品生產現場檢查結果告知書》) issued by Shanghai Medical Products Administration, notifying that the drug substance (DS) south line and drug product (DP) No. 1 line for HLX03 (adalimumab injection) at Xuhui Facility have successfully passed the on-site inspection by Shanghai Medical Products Administration. As of the Latest Practicable Date, the Xuhui Facility has completed the filing of production approval for new key equipment of four 2,000L bioreactors to Shanghai Medical Products Administration. The Group's overall commercial production capacity has been increased to 20,000L. To further improve the capacity plan, the Group also commenced the construction of the manufacturing facility at Guangfu Lin Road at Songjian District of Shanghai. The planned production capacity of the Songjiang First Plant was 24,000L including formulation filling line, which was the preparation for the Group's estimated production needs before Songjiang Second Plant was built and put into operation. Songjiang First Plant has conducted GMP production for clinical samples in the drug substance workshop from May 2020, and has built four 2,000L bioreactors. During the Reporting Period, in order to promote the development and industrialisation of continuous flow technology, the Group invested in the construction of continuous production pilot workshop at Songjiang First Plant, and completed relevant design and procurement of key equipment. In compliance with long-term production

(III) ADVANCED COMMERCIALISATION STRATEGY AND LAYOUT

Based on the mission of “to improve patients’ lives by timely providing them with quality and affordable protein therapeutics through technical innovation and operational excellence”, the Group continues to explore efficient business operation models with the purpose of improving the accessibility and affordability of biopharmaceuticals, implementing a commercialisation strategy of “focusing on product portfolio, production capacity and commercial operations, to be the biomedical leader in China”. The Group’s commercialisation team comprises five major segments: marketing, channel management, pricing and market access, domestic sales, and strategic planning, with a complete organisational structure and a clear division of responsibilities. It is expected to effectively promote the Group’s commercialisation and achieve a stable growth of sales scale.

- **COMMERCIALISATION PLANNING FOR HLX01 漢利康 (PRODUCTS TREATING HAEMATOLOGICAL TUMOURS)**

As the first domestic biosimilar in the strict sense, HLX01 漢利康 was successfully approved for marketing in 2019, which marked the start of exploitation of the domestic biosimilar market. After the launch of HLX01 漢利康, Jiangsu Fosun, a subsidiary of Fosun Pharma (controlling shareholder of the Company) is responsible for the drug’s commercial sales in mainland China. Jiangsu Fosun has a professional academic promotion team for key hospitals and a mixed-line sales team for the broader market. All members of two teams passed the technical training and assessment in related professional fields, with solid medical knowledge and communication skills.

In the first half of 2020, inclusion of HLX01 漢利康 into the procurement platform of medical insurance system in each province of mainland China has progressed smoothly. As of the end of June 2020, 29 out of 30 provinces in mainland China have approved HLX01 漢利康’s inclusion into the medical insurance procurement platform, and 26 provinces have completed official platform/filed procurement, laying the foundation for subsequent commercial sales of HLX01 漢利康.

From the beginning of 2020 to now, HLX01 漢利康 made a significant progress in the aspects of registration and approval. In April 2020, applications for the addition of 2,000L drug substance production scale and 2,000L production equipment and new 500mg/50ml/vial specifications were approved by the NMPA. In July 2020, supplemental applications for two new indications of HLX01 漢利康, including (1) the monotherapy maintenance therapy after complete or partial response under rituximab in combination with chemotherapy for patients with initially-treated follicular lymphoma; (2) fludarabine and cyclophosphamide (FC) combination therapy for patients with previously-untreated or relapsed/refractory chronic lymphocytic leukaemia (CLL), were approved by the NMPA. The Group will also promote the approval for HLX01 漢利康 in treating the rheumatoid arthritis indication. Increased production scale and production equipment, as well as new specifications and indications, will provide a strong guarantee of HLX01 (漢利康) production capacity, benefit a wider range of patients, and realise drug usages with more affordable price via combinations among different scales.

- **COMMERCIALISATION PLANNING FOR HLX02 漢曲優 (PRODUCTS TREATING BREAST CANCER AND GASTRIC CANCER)**

Being committed to providing quality and affordable innovative biopharmaceuticals to patients worldwide, the Group’s products mainly focus on the field of oncology treatment, and this part of the product is planned to be promoted in mainland China by a self-built commercialisation team of the Group.

HLX02 trastuzumab injection is the core tumour product of the Group. HLX02 漢曲優 is also the first product whose sales and promotion in mainland China will be led by the Group’s self-built commercialisation team. In order to successfully conduct the commercialisation of HLX02 漢曲優, the Group has devised a commercialisation strategy and established a core commercialisation management team. The commercialisation team comprises five major segments, namely marketing, channel management, pricing and market access, domestic sales and strategic planning. As of the end of the Reporting Period, the Group has established a commercial team of 310 people for the Chinese market, of which the core management team is composed of more than 100 experts with extensive industry experiences. The Group will continue to actively expand the coverage of each segment based on the admission progress of the product in various regions, and facilitate the construction of the marketing segment in an orderly manner based on its plans, aiming to cover more than 260 cities in the six major sales regions of the Country.

MANAGEMENT DISCUSSION AND ANALYSIS

- **COMMERCIALISATION PLANNING FOR HLX03 PRODUCTS (PRODUCTS TREATING AUTOIMMUNE DISEASES)**

According to the cooperation agreement signed between the Company and Jiangsu Wanbang, a subsidiary of Fosun Pharma, Jiangsu Wanbang will be responsible for the drug's commercial sales in China after the product launch of HLX03, and it has a large-scale professional autoimmune rheumatic business department and a mixed-line sales team for more markets, which are equipped with professional communication skills and medical knowledge as well as the experience in successful commercialisation of 優立通 (febuxostat tablets) in the field of rheumatism treatment. In order to improve the standardised medical services for patients with rheumatism in mainland China, an online management system for patients with rheumatism was set up on the internet hospital of Jiangsu Wanbang Cloud Health Technology Co., Ltd.* (江蘇萬邦雲健康科技有限公司) (a subsidiary of Jiangsu Wanbang) in the first half of 2020. Meanwhile, to coordinate the launch of HLX03 products, the sales team of Jiangsu Fosun has also further optimised and improved the dedicated sales team's level of professionalism.

(IV) RESULTS OF INTERNATIONALISED LAYOUT

Based on the internationalised positioning set at the Group's establishment and the long-term internationalisation strategy, the Group actively implements a comprehensive internationalised R&D and operation strategies, and promotes the smooth development of commercialisation of products in the international market. With the feature of "global linkage, integrated innovation" as the product development concept, the Group possesses R&D laboratories in China Shanghai, China Taipei, and USA California, and the three R&D centres collaborate closely to ensure highly productive and cost-effective R&D processes to jointly create a diverse and complete technology platform and strong independent R&D capabilities, laying a solid foundation for the Group's internationalisation strategy and entering the international market.

At the same time, the Group is proactively carrying out its global commercialisation layout. Prior to the products to be approved for marketing, it has reached strategic commercialisation cooperation with some of the world's leading pharmaceutical companies in order to rapidly occupy the global market share through the partners' existing capabilities and resources. As of the Latest Practicable Date, the Group has signed commercial cooperation agreements with international pharmaceutical companies such as Accord, Cipla Limited, Biosidus S.A., Jacobson Medical (Hong Kong) Limited, KG

In 2020, the Group will further expand its biopharmaceutical product portfolio covering oncology, auto-immune diseases and more fields, capitalise the achieved first-entrant advantages to further advance the implementation of the Group's internationalisation strategy, improve the production base construction, expand production capacity and accelerate the commercialisation of more high-quality biological products to benefit more patients worldwide.

(I) CAPITALISE ON FIRST-ENTRANT ADVANTAGES AND ACCELERATE THE LAUNCH OF COMMERCIAL SALES

As one of the leading domestic biopharmaceutical companies, the Group actively responds to national calls and complies with national pharmaceutical reforms to provide patients with high-quality and affordable biopharmaceuticals. Meanwhile, the Group has clearly established a comprehensive and efficient business operation model in five major segments including marketing, channel management, pricing and market access, domestic sales and strategic planning with patient-centric, and continue to promote the successful commercialisation of more products, so as to improve the accessibility and affordability of biopharmaceuticals. Given the low development risk and identified market potential of biosimilars, the Group will continue to accelerate the domestic commercialisation of multiple biosimilar products in the pipeline. HLX02 trastuzumab injection (trade name in mainland China: 漢曲優) was approved for launching by the NMPA in August 2020. HLX03 is expected to be approved for launching in the second half of 2020 or the first half of 2021 and to become the main driving factor other than HLX01 漢利康 and HLX02 trastuzumab injection (EU trade name: Zercepac®) for the Group's short-term revenue growth.

HLX02 trastuzumab injection (trade name in mainland China: 漢曲優) is the core tumour product whose sales promotion in mainland China will be led by the Group's self-built commercialisation team. In order to successfully commercialise it in China, the Group will continue to strengthen market access capacity-building, promote the rapid landing of national health insurance, and will plan to cover about 1,500 hospitals at all levels nationwide in the second half of 2020. In the second half of 2020, the Group also plans to actively cooperate with relevant corporations in fields such as medical big data, HER2 testing, innovative payment, and patient education to build a treatment ecosystem for HER2-positive patients. Nonetheless, the Group will actively explore the huge potential of the county market in the PRC and gradually realise the grand vision of "not leaving a HER2-positive patient behind".

In the second half of 2020, the Group will continue to strengthen the sales landing of HLX01 漢利康, capitalise the first-entrant advantages, and maintain close work with Jiangsu Fosun to focus on the continued growth of HLX01 漢利康 in the field of haematological tumours. With the releasing production capacity resulting from the approval of 2,000L production scale, and the successful approval of two new indications of HLX01 漢利康, it is expected to promote the continuous growth of the sales scale of HLX01 漢利康 and the gradual reduction of production costs, further enhancing its market competitiveness. Meanwhile, the Group will continue its cooperation with Jiangsu Wanbang to carry out preparation for sales of HLX03, and make full use of Jiangsu Wanbang's successful commercialisation experience in the field of rheumatology treatment product 優立通 (febuxostat tablets) to further improve the online management system for patients with rheumatism, build an Internet platform "Youxue Hospital" (優學醫院), and manage those patients in advance, implementing the concept construction before the product launch, and fully preparing for the future commercialisation of HLX03.

(II) MAINTAIN HIGH-QUALITY STANDARDS AND EFFICIENTLY PLAN PRODUCTION CAPACITY CONSTRUCTION AND UTILISATION

The Group will further improve the production system construction in accordance with the product R&D and launching plan, complete the production base construction and increase production capacity to provide strong guarantees for the successive commercial sales of products while achieving efficient utilisation of production capacity. The Group's Xuhui Facility plans to continually improve production efficiency through a series of lean management and process optimisation initiatives to reduce production costs. At the same time, the Group will continue to focus on the development and industrialisation of continuous flow technology in the second half of the year, with a view to ensure productivity and quality in large-scale commercial production of future products. In 2019, the Group has started construction of Songjian First Plant to prepare for the estimated capacity demand before the Songjiang Second Plant was put into operation. The planned production capacity of the Songjiang First Plant was 24,000L, including formulation filling line. The drug substance workshop has started the GMP production of clinical samples since May 2020, and is expected to complete validation of commercial production during 2020. In order to achieve long-term capacity planning, the Group will continue to promote construction of the Songjiang Second Plant for enhancing the overall production capacity of the Group. The structure of the Songjiang Second Plant Phase 1 project main production building is completed and will be put into trial production and conduct related verification work in 2021. Upon completion of construction, the Songjiang Second Plant will become the Group's base for R&D, pilot production and production of mAb biopharmaceutical drugs. This will further enhance the Group's market competitiveness in core business area, and satisfy the commercialised production demand for biosimilar and bio-innovative drugs of the Group.

(III) ACTIVELY PROMOTE R&D OF INNOVATIVE DRUGS BASED ON OUR EXTENSIVE PIPELINE

The Group will fully utilise the globally integrated independent development platform, keep up with the international trend, continue to expand and enrich the product target layout, optimise the development platform of bi-specific antibodies, and create a high-quality and affordable innovative product pipeline. In the second half of 2020, the Group will actively carry out and promote the development of innovative drugs based on the existing extensive product pipelines and mature R&D platforms. NDAs for the Group's self-developed core product innovative drug HLX10 (PD-1) are planned to be submitted to the NMPA in 2021. Meanwhile, clinical trials of combined immunotherapy of tumours with HLX10 (PD-1) as the core, for indications such as recurrent or metastatic HNSCC and metastatic colorectal cancer, are also planned to be further advanced in the second half of 2020.

While rapidly advancing the progress of clinical trials of candidate drugs in the pipeline, the Group will also continue to effectively and efficiently promote the preclinical R&D process of products under development, and accelerate the deployment of HLX26 innovative anti-LAG3 mAb, HLX23 innovative anti-CD73 mAb, HLX15 daratumumab biosimilar and other products in the global registration and approval of multiple products, and then carry out clinical research programs. At present, the Group's mAb product pipeline has extensively covered tumour-specific targets (such as EGFR, HER2 and c-Met), anti-angiogenesis targets (such as VEGF and VEGFR2) and tumour immunotherapeutic targets (such as PD-1, PD-L1, CTLA-4, LAG3, TIGIT and CD73) and during the development, the Group has accumulated a wealth of research data and practical experience on the target biological pathways and antibody interactions as well as the relationship between antibody structure and pharmacodynamics. Synthesising such data and experience, and relying on the Group's comprehensive bi-specific antibody development platform, newly optimised phage library of humanised monoclonal antibody and strong clinical trial advancing capabilities, it is expected to make important breakthroughs in the R&D of bi-specific antibodies containing PD-1, PD-L1, EGFR and HER2 targets.

As of the Latest Practicable Date, HLX71, the Group's self-developed ACE2-Fc fusion proteins product against COVID-19, and HLX70, developed anti-S1 fully human monoclonal neutralising antibody in cooperation with Sanyou Biopharmaceuticals Co., Ltd. and Shanghai ZJ Bio-Tech Co., Ltd., both of which were approved as a project under the "Public Safety Risk Prevention and Control and Emergency Response Technology and Equipment (公共安全風險防控與應急技術裝備)" of the key R&D program of China, and it is expected to submit its IND in the second half of 2020. On this basis, the Group will also continue to explore the feasibility of HLX71+HLX70 combination, and is expected to play an active role in the prevention and treatment of COVID-19 through the synergy between HLX71 and HLX70.

The Group will continue to capitalise on its international resources and advantages, further establish differentiated R&D pipelines to expand and optimise existing product pipelines, and further promote the R&D of the Group's innovative drugs.

(IV) MAINTAIN EFFICIENT OPERATIONS AND FURTHER PROMOTE THE IMPLEMENTATION OF INTERNATIONALISATION STRATEGIES

In the second half of 2020, the Group will continue to maintain the efficient operation of multiple R&D centres around the world and leverage the unique advantages of each centre: the California R&D centre in the United States continues to lead the application of cutting-edge technologies and expand the layout of differentiated targets; the Taipei R&D centre has rapidly promoted the development of animal experiments for innovative products and the development of the Phase 1 of clinical research based on the established animal experiment model. The Shanghai R&D centre has continued to improve the production process, formulation development and other process development to achieve product process optimisation.

In the second half of 2020, the Group will also continue to propel the international commercialisation of its products, actively promote the commercial cooperation for products, and promote the global registration and clinical research of multiple projects. As of the Latest Practicable Date, the Group's drug substance (DS) line and drug product (DP) line for HLX02 trastuzumab injection (EU trade name: Zercepac®) at Xuhui Facility have passed the Good Manufacturing Practice (GMP) certification by the EU. The Marketing Authorisation Application (MAA) for HLX02 trastuzumab injection (EU trade name: Zercepac®) submitted by a business partner of the Group for the treatment of HER2-positive early-stage breast cancer, HER2-positive metastatic breast cancer and untreated HER2-positive metastatic adenocarcinoma of the stomach/gastroesophageal junction has been approved by European Commission (EC). The Group will continue to collaborate with Accord, our cooperative partner, in actively proceeding with the commercialisation for HLX02 trastuzumab injection (EU trade name: Zercepac®) in the EU. Meanwhile, the Group will continue to seek potential strategic cooperation with more international partners through business development, and will further promote core products into a broader international market through these international strategic partners, in particular for the entry to emerging markets with significant unfulfilled medical needs for affordable pharmaceutical products, to benefit patients overseas while actively searching for potential targets in order to make the Group's product pipeline more extensive.

MANAGEMENT DISCUSSION AND ANALYSIS

I I I F N A R A I L C V W E E

(I) REVENUE

The Group began the commercialisation of HLX01 (漢利康) in China in May 2019. Prior to that, the Group did not commercialise any products and therefore did not generate revenue from the sale of products. The total revenue of the Group for the six months ended 30 June 2020 was approximately RMB110.4 million, representing an increase of approximately RMB93.4 million as compared with that for the six months ended 30 June 2019, which was mainly from the sales growth of the commercialisation of the Group's core product. According to the cooperation arrangement with Fosun Pharmaceutical Industrial Development, Fosun Pharmaceutical Industrial Development fully reimbursed the related expenditures incurred for clinical trials of HLX01 (漢利康) conducted by the Group after the signing of relevant cooperation agreement. After the commercialisation of HLX01 (漢利康), the Group was responsible for the production and the supply of HLX01 (漢利康) to Fosun Pharmaceutical Industrial Development in China, and shared a portion of the profit with Fosun Pharma Industrial Development from the sales in China pursuant to the contract. For the six months ended 30 June 2020, primarily through the profit sharing arrangements under the cooperation agreement with Fosun Pharmaceutical Industrial Development, the Group achieved a total sales revenue of HLX01 (漢利康) of RMB95.8 million, and realised licensing income of RMB5.2 million. We intend to further raise public awareness of HLX01 (漢利康) by ramping up our marketing and sales efforts. We also plan to market our drug products through our commercialisation partners under well-established strategies.

On 25 September 2019, the Group entered into a cooperative R&D and commercialisation agreement with KG Bio on HLX10 (the Group's bio-innovative drug with original and exclusive patents and technical knowledge). For the six months ended 30 June 2020, the Group recognised the revenue from R&D services of approximately RMB9.2 million.

(II) COST OF SALES

The Group's cost of sales primarily represents reagents and consumables, employee compensation, outsourcing expenses, utilities expenses and depreciation and amortisation. For the six months ended 30 June 2020, the Group recorded cost of sales of RMB58.4 million, representing an increase of approximately RMB47.1 million as compared with that for the six months ended 30 June 2019, which was due to the production cost of HLX01 (漢利康).

(III) GROSS PROFIT

For the six months ended 30 June 2020, the Group recorded a gross profit of RMB52.0 million, representing an increase of approximately RMB46.3 million as compared with that for the six months ended 30 June 2019, with an increase rate of 812.3%, mainly because the Group received the NDA approval for HLX01 (漢利康) in mainland China in February 2019.

(IV) OTHER INCOME AND GAINS

Other income and gains of the Group mainly included bank interest income and government grants income. Government grants included (1) government grants for capital expenditure in relation to the purchase of machinery and equipment (recognised over the useful life of the relevant assets); (2) incentives for R&D activities and interest support as well as other supports (recognised after satisfying certain conditions promulgated by the government).

For the six months ended 30 June 2020, the Group recognised other income and gains of approximately RMB34.3 million.

T	6	3	39	3	2	303,353

MANAGEMENT DISCUSSION AND ANALYSIS

For the six months ended 30 June 2020, the Group recognised R&D expenditure of approximately RMB756.9 million, representing an increase of approximately RMB228.4 million or approximately 43.2% as compared with approximately RMB528.5 million for the six months ended 30 June 2019. The increase in our total R&D expenditure was mainly due to (1) the increases in clinical trial expenditure and costs of pre-clinical studies in line with our expanding pipeline and progress of R&D activities; (2) the increases in the number of R&D employees and their salaries; and (3) the continuous development of overall progress of clinical trials as anticipated.

(VI) ADMINISTRATIVE EXPENSES

Administrative expenses mainly included administrative staff costs, office administrative expenses, depreciation and amortisation, etc.

For the six months ended 30 June 2020, the Group recognised administrative expenses of approximately RMB63.2 million as compared to that of RMB66.1 million for the six months ended 30 June 2019. Administrative expenses of the Group was mainly derived from (1) the salaries of administrative employees as required by the expansion of the Company's operations and development; (2) office administrative expenses in conjunction with business development; and (3) other consultation fees.

(VII) SELLING AND DISTRIBUTION EXPENSES

The Group's selling and distribution expenses mainly included salaries and other expenses as well as promotional activity expenses.

For the six months ended 30 June 2020, the Group recognised selling and distribution expenses of approximately RMB56.6 million with an increase of approximately RMB43.7 million as compared to those of approximately RMB12.9 million for the six months ended 30 June 2019. Such increase was mainly because the Group established a business operation team ahead of the upcoming formal launch of HLX02 and various commercial activities continuously increased during the Reporting Period.

(VIII) OTHER EXPENSES

For the six months ended 30 June 2020, the Group recognised other expenses of approximately RMB4.5 million, representing a decrease of RMB4.0 million as compared to those of RMB8.5 million for the six months ended 30 June 2019. Other expenses were mainly related to the donation to various charitable organizations during the Reporting Period.

(IX) INCOME TAX EXPENSE

For the six months ended 30 June 2020 and 2019, the Group did not incur any income tax expenses.

(X) LOSS FOR THE PERIOD

In view of the above, the Group's loss increased by RMB131.1 million from RMB316.9 million for the six months ended 30 June 2019 to RMB448.0 million for the six months ended 30 June 2020.

(XI) LIQUIDITY AND CAPITAL RESOURCES

As of 30 June 2020, the cash and cash equivalents of the Group were RMB1,146.4 million, mainly denominated in Renminbi, United States Dollars, New Taiwan Dollars and Euro, where such decrease was mainly due to various expenses arising from the production and R&D and clinical activities. As of 30 June 2020, the current assets of the Group amounted to RMB1,671.5 million, including cash and cash equivalents of RMB1,146.4 million, pledged deposits of RMB9.3 million, inventories of RMB165.0 million, trade receivables of RMB85.9 million, and prepayments, other receivables and other

x) **TRADE RECEIVABLES**

As of 30 June 2020 and 31 December 2019, trade receivables from customer contracts were RMB85.9 million and RMB29.8 million, mainly due to the increase in trade receivables corresponding to the commercialisation of HLX01 (漢利康). There were no changes in accounting estimates or material assumptions made in both periods.

x v) **INTEREST-BEARING BANK AND OTHER BORROWINGS**

As of 30 June 2020, borrowings from bank and other institutions of the Group (excluding lease liabilities) were RMB403.4 million. The Group incurred new borrowings for the following reasons: ongoing clinical research trials and pre-clinical research for drug candidates, commercialisation of HLX01 (漢利康) and normal operating expenses. The Group's borrowings were mainly denominated in RMB.

Such borrowings bear interest at fixed annual interest rates. There was no material influence of seasonality on the Group's borrowing needs.

x v) **MATURITY STRUCTURE OF OUTSTANDING DEBTS**

The following table sets forth the maturity structure of outstanding debts as at 30 June 2020 and 31 December 2019. Of which, lease liabilities were initially recognised upon the adoption of IFRS 16 – Leases on 1 January 2017.

	30 June 2020	31 December 2019
	RMB'000	RMB'000
	Unaudited	Audited
Within one year	418,230	278,241
In the second year	1,373	206,418
In the third to fifth year (inclusive)	1,697	96,153
Over five years	78,020	28,577
Total	609,389	609,389

x v) **COLLATERAL AND PLEDGED ASSETS**

As at 30 June 2020, the Group's pledged assets in relation to borrowings including trade receivables and other receivables of RMB9.7 million.

MANAGEMENT DISCUSSION AND ANALYSIS

KEY FINANCIAL RATIOS

	30 June 2020	31 December 2019
Current ratio ⁽¹⁾ :	1.867	277.3%
Quick ratio ⁽²⁾ :	1.9	263.7%
Gearing ratio ⁽³⁾ :	N/A	N/A ⁽⁴⁾

Notes:

- (1) Current ratio is calculated as current assets divided by current liabilities as of the same day.
- (2) Quick ratio is calculated as current assets minus inventories and then divided by current liabilities as of the same day.
- (3) Gearing ratio is calculated as net debt divided by equity attributable to owners of the parent plus net debt, multiplied by 100%. Net debt represents the balance of indebtedness less cash and cash equivalents as at the end of the period.
- (4) The Group did not have a gearing ratio as at 30 June 2020 and 31 December 2019 as the Group's balance of cash and cash equivalents exceeded the Group's total indebtedness on that date.

MATERIAL INVESTMENT

In order to meet the expected market demand of drugs in our pipeline, the Group is currently constructing a new manufacturing facility in Shanghai, the Songjiang Second Plant, to maximise our overall production capacity. Songjiang Second Plant is designed to include the manufacturing equipment, technologies and processes that are substantially the same as those adopted and to be implemented at the Xuhui Facility. The Group expects that following the full operation of Songjiang Second Plant, it will be able to support our global commercialisation needs in the future.

The Company is expected to invest not more than RMB1.72 billion for the construction of the Phase I project of Songjiang Second Plant (first stage and second stage). As at the end of the Reporting Period, the facility is under construction and the subsequent stages of construction will be gradually carried out based on the strategy of the Group. The capital expenditure of the construction of Songjiang Plant will be mainly funded through debt financing.

For details of the Songjiang Second Plant, please refer to the section headed "Business Review for the First Half of the Year-Forward-looking Production Capacity Layout with High Cost-efficiency". Save as disclosed in this announcement, as of 30 June 2020, the Group did not make any significant investments.

CAPITAL COMMITMENTS AND CAPITAL EXPENDITURES

	30 June 2020	31 December 2019
	RMB'000	RMB'000
	Unaudited	Audited
Plant and machinery	4,462,255	146,439
Construction in progress	6,825	36,143
Electronic equipment	4,967	15,990
Leasehold improvements	66,325	32,686
TOTAL	1,682,088	231,258

We had capital commitments for plant and machinery contracted but not provided for were of RMB485.1 million as at 30 June 2020. These capital commitments were primarily related to the expenditures expected to be incurred for the purchase of machinery and the renovation of our existing laboratories and buildings.

x x) **CONTINGENT LIABILITIES**

As of 30 June 2020, the Group did not have any significant contingent liabilities.

x x) **MATERIAL ACQUISITIONS AND DISPOSALS**

As of 30 June 2020, the Group did not have material acquisitions and disposals.

x x) **INTERIM DIVIDENDS**

The Group did not pay or declare any dividend during the two periods ended 30 June 2020 and 30 June 2019.

S R V I M H A N A M G N E E

(I) FOREIGN EXCHANGE RISK

As of 30 June 2020, the Group is principally engaged in business in the PRC, in which most of the transactions are settled in RMB with no significant foreign exchange risk. No financial instrument for hedging foreign exchange risk or other hedging purposes was employed.

(II) EXCHANGE RATE RISK

Currently, the major business operation of the Group is in the PRC and most of the revenue and expenses are settled in RMB, which is the Group's reporting currency. Furthermore, with the acceleration of the Group's development in overseas markets, it is expected that the sales revenue denominated in USD and Euro will increase in the future. Fluctuations in exchange rates may affect the Group's cash flows, revenues, earnings and financial position.

(III) POTENTIAL RISKS

1. MARKET RISK

The biologics market is highly competitive, and the Group's existing commercialised products and products that may be commercialised in the future face competition from pharmaceutical companies around the world on various factors such as treatment indication, drug novelty, drug quality and reputation, breadth of our drug portfolio, manufacturing and distribution capacity, drug price, coverage and depth of customer, consumer behaviour and supply chain relationships. The Group's ability to remain competitive depends to a large extent on our ability to innovate, develop and market new products and technologies that meet market needs in a timely manner to capture market share.

2. BUSINESS AND OPERATIONAL RISK

The global biologics market is constantly evolving, and the Group invests significant amounts of human and capital resources to develop, enhance or acquire technologies that will allow the Group to enhance the scope and quality of our services. Most of the Group's drug candidates are under development and are in the clinical development stages, and the course of clinical development involves a lengthy and expensive process with uncertainties in various aspects, there can be no assurance from the Group of the development and clinical results. Furthermore, if the clinical development and regulatory approval process of our drug candidates were delayed or terminated, the successful development and commercialisation of the Group's drug candidates in a timely manner maybe adversely affected.

3. POTENTIAL RISKS OF COVID-19

The epidemic of COVID-19 may have potential impacts on the Group's business, including but not limited to the advancement of clinical trials, approval of regulatory registration, procurement of raw materials, and construction progress of production base. The Group will continue to observe the epidemic situation and make all preparations in advance.

MANAGEMENT DISCUSSION AND ANALYSIS

V M . S P L E O . R A E E M D R U N E A T E D N S P Q L I I C E

The following table sets forth the breakdown of our employees by function as at 30 June 2020:

F	N
Management and administrative	157
R&D	347
Quality and technical support	223
Manufacturing	347
Clinical medical affairs	245
Commercial Operation	310
T	1,639

The Group enters into individual employment contracts with our employees setting out terms such as salaries, bonuses, grounds for termination and confidentiality. Employment contracts with our R&D personnel also typically contain a non-competition clause. The Group also provides benefits to our employees as part of their compensation package which we believe is in line with industry norm. For example, PRC-based employees are entitled to social insurance as mandated by the PRC Social Insurance Law, including pension, basic medical insurance, maternity insurance, work-related injury insurance, unemployment insurance and housing provident fund. To stay competitive in the market for talents, we have also adopted share award schemes to give incentives to our employees. The Group emphasises on-the-job training as a constant, ongoing objective for the employees. All employees participate in formal training on an annual basis, where the Group focuses on the latest technical developments and updates in regulatory requirements.

S S V . I U Q U B E N W N E E

Save for those disclosed in this report, no major subsequent event has occurred since the end of the Reporting Period and up to the date of this report.

NOTES TO INTERIM CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

30 J 2020

R . R O P C O A T R N I M E F O A T D N

Shanghai Henlius Biotech, Inc. (the “Company”) is a joint stock company with limited liability established in the People’s Republic of China (“PRC”). The registered office of the Company is located at Room 303, 304, Block 7, No.1999 Zhangheng Road, China (Shanghai) Pilot Free Trade Zone.

The Company and its subsidiaries are involved in the following principal activities:

- biopharmaceutical research and development (“biopharmaceutical R&D”)
- biopharmaceutical service
- biopharmaceutical production

In the opinion of the directors of the Company, the ultimate holding company of the Company is Fosun International Holdings Limited which is a company registered in Hong Kong, and the ultimate controlling shareholder of the Company is Mr. Guo Guangchang.

The shares of the Company have been listed on the Main Board of the Stock Exchange of Hong Kong Limited (the “Stock Exchange”) since 25 September 2019.

S 25 . A S B O P F W E A T E D N A N S D A H N C T G E R H S E W B A O I D C W C N I S P Q L G I I C E

2.1. BASIS OF PREPARATION

The interim condensed consolidated financial information for the six months ended 30 June 2020 has been prepared in accordance with IAS 34 *Interim Financial Reporting*. The interim condensed consolidated financial information does not include all the information and disclosures required in the annual financial statements, and should be read in conjunction with the Group’s annual consolidated financial statements for the year ended 31 December 2019.

2.2. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

The accounting policies adopted in the preparation of the interim condensed consolidated financial information are consistent with those applied in the preparation of the Group’s annual consolidated financial statements for the year ended 31 December 2019, except for the adoption of the following revised International Financial Reporting Standards (“IFRSs”) for the first time for the current period’s financial information.

Amendments to IFRS 3	<i>Definition of a Business</i>
Amendments to IFRS 9, IAS 39 and IFRS 7	<i>Interest Rate Benchmark Reform</i>
Amendment to IFRS 16	<i>Covid-19-Related Rent Concessions</i> (early adopted)
Amendments to IAS 1 and IAS 8	<i>Definition of Material</i>

2.2. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

Other than as explained below regarding the impact of Amendment to IFRS 16, the revised standards did not have an impact on the interim condensed consolidated financial information of the Group. The nature and impact of the revised IFRSs are described below:

- (a) Amendments to IFRS 3 clarify and provide additional guidance on the definition of a business. The amendments clarify that for an integrated set of activities and assets to be considered a business, it must include, at a minimum, an input and a substantive process that together significantly contribute to the ability to create output. A business can exist without including all of the inputs and processes needed to create outputs. The amendments remove the assessment of whether market participants are capable of acquiring the business and continue to produce outputs. Instead, the focus is on whether acquired inputs and acquired substantive processes together significantly contribute to the ability to create outputs. The amendments have also narrowed the definition of outputs to focus on goods or services provided to customers, investment income or other income from ordinary activities. Furthermore, the amendments provide guidance to assess whether an acquired process is substantive and introduce an optional fair value concentration test to permit a simplified assessment of whether an acquired set of activities and assets is not a business. The Group has applied the amendments prospectively to transactions or other events that occurred on or after 1 January 2020. The amendments did not have any impact on the financial position and performance of the Group.
- (b) Amendments to IFRS 9, IAS 39 and IFRS 7 address the effects of interbank offered rate reform on financial reporting. The amendments provide temporary reliefs which enable hedge accounting to continue during the period of uncertainty before the replacement of an existing interest rate benchmark. In addition, the amendments require companies to provide additional information to investors about their hedging relationships which are directly affected by these uncertainties. The amendments did not have any impact on the financial position and performance of the Group as the Group does not have any interest rate hedge relationships.
- (c) Amendment to IFRS 16 provides a practical expedient for lessees to elect not to apply lease modification accounting for rent concessions arising as a direct consequence of the COVID-19 pandemic. The practical expedient applies only to rent concessions occurring as a direct consequence of the COVID-19 pandemic and only if (i) the change in lease payments results in revised consideration for the lease that is substantially the same as, or less than, the consideration for the lease immediately preceding the change; (ii) any reduction in lease payments affects only payments originally due on or before 30 June 2021; and (iii) there is no substantive change to other terms and conditions of the lease. The amendment is effective retrospectively for annual periods beginning on or after 1 June 2020 with earlier application permitted.

During the period ended 30 June 2020, certain monthly lease payments for the leases of the Group's office buildings have been reduced by the lessors as a result of the COVID-19 pandemic and there are no other changes to the terms of the leases. The Group has early adopted the amendment on 1 January 2020 and elected not to apply lease modification accounting for all rent concessions granted by the lessors as a result of the COVID-19 pandemic during the period ended 30 June 2020. Accordingly, a reduction in the lease payments arising from the rent concessions of RMB81,000 has been accounted for as a variable lease payment by derecognising part of the lease liabilities and crediting to loss for the period ended 30 June 2020.

2.2. CHANGES IN ACCOUNTING POLICIES AND DISCLOSURES

- (d) Amendments to IAS 1 and IAS 8 provide a new definition of material. The new definition states that information is material if omitting, misstating or obscuring it could reasonably be expected to influence decisions that the primary users of general purpose financial statements make on the basis of those financial statements. The amendments clarify that materiality will depend on the nature or magnitude of information. The amendments did not have any impact on the Group's interim condensed consolidated financial information.

3 R R D S A T E N I M G E R G R E N I M F O A T D N

The Group is engaged in biopharmaceutical R&D, biopharmaceutical service and biopharmaceutical production, which is regarded as a single reportable segment in a manner consistent with the way in which information is reported internally to the Group's senior management for purposes of resource allocation and performance assessment. Therefore, no analysis by operating segment is presented.

The provision for Mainland China current income tax is based on the statutory rate of 25% of the assessable profits of the Group as determined in accordance with the PRC Corporate Income Tax Law which was approved and became effective on 1 January 2008. The provision for current income tax of Taiwan Henlius, a subsidiary of the Group incorporated in Taiwan, was based on the statutory rate of 20% for the six months ended 30 June 2020.

Taxes on profits assessable elsewhere have been calculated at the tax rates prevailing in the jurisdictions in which the Group operates.

Current – China	—	—
Current – Other countries	—	—
Total tax charge for the period	—	—

No dividend has been paid or declared by the Company during the Reporting Period.

The calculation of the basic loss per share amount is based on the loss attributable to ordinary equity holders of the parent and the weighted average number of ordinary shares of 524,850,249 (six months ended 30 June 2019: 451,683,053) in issue during the period.

The calculation of the diluted loss per share amount is based on the loss for the period attributable to ordinary equity holders of the parent. The weighted average number of ordinary shares used in the calculation is the number of ordinary shares in issue during the six months ended 30 June 2020, as used in the basic loss per share calculation, and the weighted average number of all dilutive potential ordinary shares into ordinary shares.

Share award scheme	-	635	7,463
	19	698	14,808

The carrying amounts of the Group's financial instruments, other than those with carrying amounts that reasonably approximate to fair values, are as follows:

	31 December 2019		31 December 2019	
	RMB	'000	RMB	'000
	(Audited)		(Audited)	
Interest-bearing bank and other borrowings (non-current portion) (other than lease liabilities)	190	430	190	313

Management has assessed that the fair values of cash and cash equivalents, pledged deposits, financial assets included in prepayments, other receivables and other assets, trade receivables, trade and bills payables, financial liabilities included in other payables and accruals, and the current portion of interest-bearing bank and other borrowings approximate to their carrying amounts largely due to the short term maturities of these instruments.

The Group's principal financial instruments comprise cash and cash equivalents, and interest-bearing bank and other borrowings. The main purpose of these financial instruments is to raise finance for the Group's operations. The Group has various other financial assets and liabilities such as trade receivables, financial assets included in prepayments, other receivables and other assets, trade and bills payables and financial liabilities included in other payables and accruals, which arise directly from its operations.

There have been no significant events since the end of the Reporting Period.

The interim condensed consolidated financial statements were approved and authorised for issue by the board of directors on 24 August 2020.

GENERAL INFORMATION

The Group's results for the six months ended 30 June 2020 and the financial position of the Group as at 30 June 2020 are set out in the interim condensed consolidated financial statements and the accompanying notes on pages 26 to 45. The Board has not recommended the distribution of any interim dividend for the Reporting Period.

During the Reporting Period, neither the Company nor any of its subsidiaries has purchased, sold or redeemed any of the Company's listed securities.

As at 30 June 2020, the Directors/Supervisors and chief executive of the Company have no short position in the shares, underlying shares or debentures of the Company or any of its associated corporations (within the meaning of Part XV of the SFO). The interest or long positions of Directors/Supervisors and chief executive of the Company in the shares, underlying shares and debentures of the Company or any of its associated corporations as recorded in the register required to be kept by the Company pursuant to Section 352 of the SFO, or the interest and long positions should be notified to the Company and the Stock Exchange pursuant to the Model Code were as follows:

(A) INTEREST IN THE SHARES OF THE COMPANY

Name of Shareholder	Capacity	Class of Shares	Number of Shares	Percentage of Total Shares	Percentage of Issued Shares
Scott Shi-Kau Liu	Beneficial owner	H Shares	2,410,695	1.48%	0.44%
	Interest in controlled entity ⁽¹⁾	H Shares	58,977,060	36.09%	10.85%

Note:

- (1) As at 30 June 2020, Dr. Scott Shi-Kau Liu held approximately 62.96% of the shares in Cayman Henlius. Dr. Scott Shi-Kau Liu was deemed to be interested in the H Shares which Cayman Henlius was interested in under the SFO. On 24 December 2019, Cayman Henlius has pledged a total of 3,192,339 H Shares to Fosun Industrial Co., Limited, a wholly-owned subsidiary of Fosun Pharma. On 8 May 2020, Cayman Henlius has pledged a total of 24,087,376 H Shares to CMB International Securities Limited.

(B) INTERESTS IN SHARES OF ASSOCIATED CORPORATIONS

N	N	C	N	N	A
Scott Shi-Kau Liu	Fosun International	3,000,000 shares	Beneficial owner	0.04%	
Qiyu Chen	Fosun International	20,578,000 shares	Beneficial owner	0.24%	
	Fosun Pharma	114,075 A shares	Beneficial owner	0.01%	
	Fosun Tourism Group	1,478 shares	Beneficial owner	0.00%	
Yifang Wu	Fosun Pharma	342,000 H shares	Beneficial owner	0.06%	
	Fosun Pharma	718,900 A shares	Beneficial owner	0.04%	
Xiaohui Guan	Fosun Pharma	181,000 A shares	Beneficial owner	0.01%	
Deli Kong	Fosun Pharma	8,500 A shares	Beneficial owner	0.00%	

Save as disclosed in the foregoing, as at the date of this interim report, none of the Directors/Supervisors or chief executive of the Company or their respective close associates had any interests or short/long positions in any shares, underlying shares or debentures of the Company or any of its associated corporations as recorded in the register required to be kept pursuant to Section 352 of the SFO or as otherwise notified to the Company and the Stock Exchange pursuant to the Model Code.

During the Reporting Period, no rights to acquire benefits by means of the acquisition of shares, underlying shares or debentures of the Company were granted to any Directors/Supervisors or chief executive of the Company or their respective spouses or minor children, or were any such rights exercised by them; nor was the Company, its holding company, or any of its subsidiaries or fellow subsidiaries a party to any arrangement which enabled the Directors/Supervisors or chief executive of the Company to acquire such rights in any other corporation.

S U F F I C I E N T P U B L I C F L O A T

Based on the information publicly available to the Company and to the knowledge of the directors of the Company, during the Reporting Period, the Company has maintained sufficient public float as required by the Listing Rules.

GENERAL INFORMATION

- (4) The net proceeds figures have been translated to Renminbi for the allocation and the utilization calculation, and have been adjusted slightly due to the fluctuation of the foreign-currency exchange rates since the listing and proportionally in accordance with the Prospectus taking into account the final offer price of the Global Offering and the partial exercise of the over-allotment option.
- (5) The majority of the net proceeds from the Global Offering are allocated to fund ongoing clinical trials, regulatory filings and registrations of the Company's drugs and therapies, the outcome and hence the timeframe, of which are not within the control of the Company. Please refer to the section headed "Management Discussion and Analysis" in this interim report for further details.

Other than fund raising activity as set out above, the Company has not conducted any other fund raising activities involving the issue of equity securities within 12 months immediately prior to the Latest Practicable Date.

2. PROPOSED A SHARE OFFERING ON THE SHANGHAI STOCK EXCHANGE

On 30 March 2020, the Company has announced the proposal to make an application to the relevant regulatory authorities in the PRC for the allotment and issue of A Shares and an application to the Shanghai Stock Exchange for the listing of, and permission to deal in, the A Shares on the Science and Technology Innovation Board of Shanghai Stock Exchange (the "Proposed A Share Offering"). On 27 April 2020, a circular containing the details of the Proposed A Share Offering was despatched to the Shareholders. On 12 June 2020, the resolutions in relation to the Proposed A Share Offering were duly passed.

Other than fund raising activity as set out above, the Company has not conducted any other fund raising activities involving the issue of equity securities within 12 months immediately prior to the Latest Practicable Date.
